

Pocket Sized Cable Testers

Wireworks has developed the most useful line of 3 individual cable testers using state-of-the-art technology, high quality durable materials and the latest manufacturing techniques. The end result is a group of 'intelligent' cable testers that could only have been built by Wireworks.

Wireworks pocket-size cable testers quickly show if a cable is good or bad. By means of push buttons, a series of tests is performed on your cable and a series of LEDs clearly displays the result. Your tester will indicate not just if the cable is good or bad but exactly identifies the problem with a malfunctioning cable.

Pocket Sized Convenience

Three pocket size testers allow testing of cables from microphone to loudspeaker and from BNC to DMX.

The TE-3Plus, TEN-4 and TED-5 pocket size cable testers each have the same philosophy – simplicity and convenient size, without sacrificing any necessary display information. They all show shorts to case, shorts between conductors, open circuits and cross-wiring by means of an easily understood LED display. Positive feel push buttons make testing fast in the field and in the shop.

Test a wide range of cables

To cover a wide range of cable designs, the three pocket-sized testers will together test XLR, 1/4" TRS, BNC, Speakon and 3 and 5 pin DMX cables. With Wireworks pocket size cable testers you will know if your cable is good-to-go or ready to throw!

These unique cable testers are small enough and light enough to carry to on-site locations; yet tough enough to withstand harsh every day use. They save you time by eliminating guesswork and tedious trial-and-error testing of audio, video and lighting control cables is avoided.

Every technician needs good tools. Wireworks Pocket Sized Cable Testers are essential tools for the job. Small, heavy duty, accurate and easy to use, they do the job and do it well – just like a professional tool should.

Pocket Sized Cable Testers

Features Overview

- Pocket-sized for easy portability
- Powered by a single 9 volt battery & lasts for years
- Battery life for more than 1000 tests
- Snap-action switches enable you to hear when contact is made
- Intuitive operation
- LED display for easily read information
- Tests indicate conductors that are open circuit, shorted, to case and cross wired
- Eliminates trial-and-error testing
- Rugged and durable construction for the demands of extended field use
- The necessary addition to your technicians' field kit
- Saves valuable labor time

TE-3 Plus

Wireworks TE-3Plus Cable Tester is a vital tool for all sound and video engineers, technicians, installers, and other professionals who value their time.

The TE-3Plus tests microphone, instrument and video cables using XLR, ¼"TRS and BNC connectors. Also it will test mixed connector cables: XLR to ¼" TRS etc. Simply plug them into the TE-3Plus and push the buttons. Three bright LEDs will tell the full story.

Handy, convenient, and pocket-sized for portability, Wireworks TE-3Plus is the essential accessory. It ensures a functional and reliable audio/video

cabling system.

The TE-3Plus is the ideal companion to Wireworks TEN-4 Speaker Cable Tester and the TED-5 DMX Cable Tester.

TEN-4

Wireworks TEN-4 Speaker Cable Tester makes it easy to test speaker cable assemblies terminated with any combination of Neutrik NL 4 connectors and ¼" phone plugs. TEN-4 will test Neutrik NL 4 to NL 4 both 2 and 4 conductor wiring, ¼" phone plug to ¼" phone plug and any combination of NL 4 to one or two ¼" phone plugs. This allows you to easily test adapters from four circuit NL 4 to two ¼" phone plugs. Four bright LEDs indicate the full information about the cable status.

The TEN-4 Speaker Cable Tester is the perfect companion to Wireworks TE-3Plus Microphone Cable Tester and the TED-5 DMX Cable Tester.

TED-5

Wireworks TED-5 provides the opportunity to easily and reliably test DMX lighting control cables in both 5 and 3 pin configurations. The TED-5 tests for shorts, open circuits, cross wiring and shorts-to-case problems in 5 and 3 pin XLR cables. (This means that the TED-5 Cable Tester can be also used to test Microphone cables!)

Lighting technicians will find the TED-5 to be an indispensable tool that they will want to keep constantly at hand. All the guesswork and trial-and-error testing is

taken out of the equation. Now you will know for sure whether your DMX cables are ready to perform. Five LEDs show all the information you will need.

The TED-5 DMX Cable Tester is the perfect companion to Wireworks TE-3Plus Microphone Cable Tester and the TEN-4 Speaker Cable Tester
