

TacCat Network Cords

Wireworks new super tough TacCat Network Cords and Multi-TacCat Assemblies provide CAT5e networking in a tough, road-ready construction that won't let you down in the studio, on stage or on tour. Available in single channel cords and multichannel assemblies, these new networking cables are the clear choice for on-the-road Ethernet and digital audio applications.

TacCat Assemblies feature full spec CAT5e in a heavy-duty outer jacket that is more than twice the thickness of computer room patch cables.

TacCat Network Cords are available with Neutrik's etherCON data connectors or traditional RJ45 Ethernet connectors, both with colored boots for fast cable recognition. TacCat cords and assemblies are available in a variety of standard lengths with custom lengths to order.

Wireworks **TacCat Multichannel Assemblies** are designed with four individual CAT5e cables jacketed in a single road-ready outer jacket. The individual CAT5e cables are color-coded for easy identification. The end of each CAT5e cable is terminated with etherCON connectors or standard RJ45s.

Add Wireworks Bandits®, shrink-tube cable markers custom printed with your company name or logo, for easy identification.

- Double jacket construction for superior durability
- Choice of 14 standard lengths
- Custom lengths to order
- Terminated with Neutrik etherCON or traditional RJ45 connectors
- Choice of color boot on etherCON and RJ45s for easy identification

‡ Wireworks Bandits® are custom printed shrink tubing labels that are installed when the cable is being manufactured. Bandits® are available in Black, Red, Blue, Orange, Yellow, Green and White which can be used for identification or length designation. Custom printing can be your company name, or other personalized information. Logos can also be printed depending on size and complexity. Simply ask your sales representative about Bandits® when ordering Wireworks Products.
