

DT12 Audio Cabling for Sports Broadcasting

With a view to the needs of the Mobile Sports Broadcast Community, Wireworks has combined legendary durability with high quality workmanship in products that satisfy the most demanding professionals.

The Winning Solution for Sports Broadcasting

Wireworks DT12 Sports Broadcasting Audio Cabling products are a complete line of high-end assemblies, built to support the mobile cabling requirements of professional sports broadcasters. They provide 12 channels of audio to be routed long distances from golf course, court or playing field back to the production truck with convenient thru-wired breakouts as required along the cable run. The DT12 line comprises a full range of assemblies including break-out boxes, trunk and tail assemblies and rack-mounted transformer isolated mic splitters which are designed to ensure efficient and reliable audio cabling for the ever changing needs of the broadcast professional.

Size Matters!

Understanding that space is often at a premium on Broadcast trucks and on site, DT12 steel breakout boxes are a quarter the size of available alternatives - just three inches square, barely larger than the DT12 connectors themselves - while enhancing strength and dependability. Recessed Neutrik XLR black/gold connectors and dual sided channel identification allow for use in any orientation. It's ingeniously designed with the broadcaster in mind.

Similarly, DT12 trunks are manufactured with full sized 22 AWG conductors providing lower signal loss especially in the long run cables commonly required in remote sporting environments. This rugged cable design coupled with Wireworks manufacturing expertise guarantees continuous first class service in permanent, remote and road applications.

Built to Survive

Of course, all cable is 100% shielded to prevent electrical interference and cross-talk. All connector XLR contacts are gold plated to prevent oxidation in out-of-doors use. As in all Wireworks products, no plastic connectors or pop-rivets are used anywhere! All connector shells are

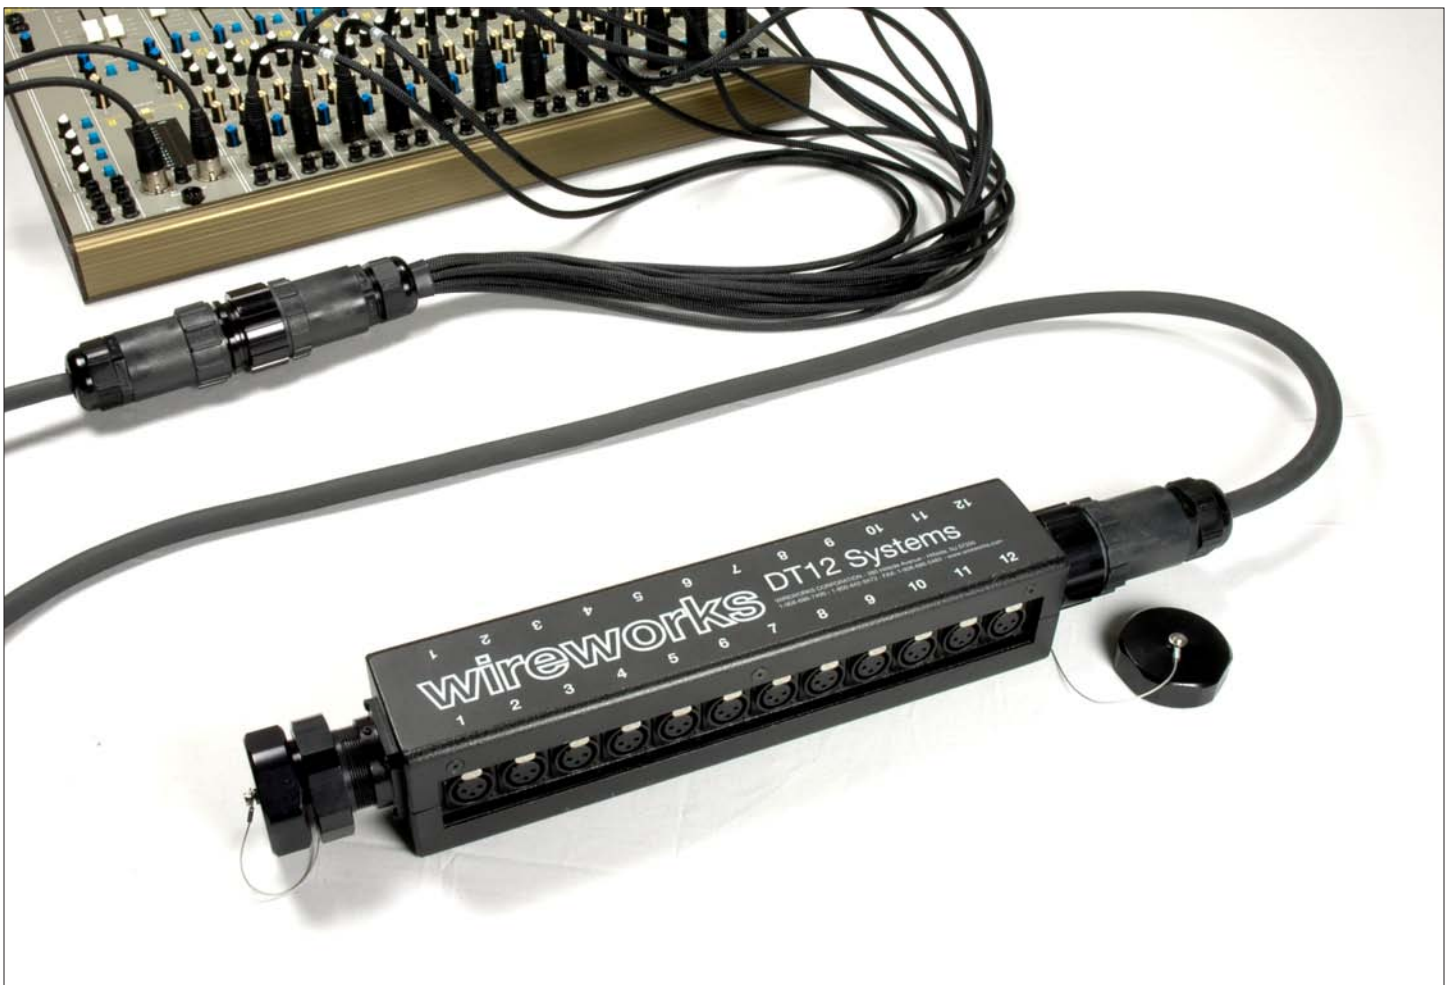

heavy duty to assure strength and longevity.

When you need to connect with DT12 cables without any worry, you need Wireworks.

DT12 Sports Broadcast Cabling

Features Overview

- Full size conductors used throughout
- Ideally suited for mobile sports broadcast applications
- Super heavy duty all metal DT12 connectors
- Superior Euro-design cable clamp and strain relief
- Gold contacts used throughout
- Heavy duty rubber protective connector boots
- Many standard cable trunk lengths
- Durable 4 or 8 Ft. DT12 Fan outs
- Male or Female DT12 connectors with cover caps
- All Neutrik Black/Gold XLR Connectors
- All channels clearly marked
- Various connector arrangements available
- Heavy duty steel break-out boxes
- Sleek low profile design
- One quarter the size of similar box designs for convenient storage and transportation
- All screw mounted connectors
- XLR connectors are recessed for added protection
- Smooth welded steel construction to eliminate snagging
- Durable black powder coat finish
- Channels clearly marked on both sides of box for instant identification
- DT12 connector covers securely attached to the box
- Custom products available
